

PRESS RELEASE

The recent acquisition of Ezi Security Systems by AOS Group has allowed EZI to significantly improve service to customers and the quality and range of its products.

Ezi Products are built to last!

Ezi Service

With broader bases in both staff numbers and geographical coverage, the combined Service personnel will continue to offer prompt service response times and reliable performance on all routine maintenance. This new structure has afforded significant economies of scale and accordingly we have been able to revise not only our maintenance charges but also our spare parts costs to reflect these savings.

We at Ezi stand behind our product and its continual service and maintenance which are an important part of giving value to our customers and proving that we have the best product in the market. As any warranties on our products are voided if they are serviced or maintenance by others, we have taken every step to ensure our **rates** and our **service** are the most competitive in the market place.

All our Service Technicians are now connected by phone and email, so that in addition to calling, feel free to use our email service service@ezisecurity.com.au at your convenience. We welcome any ongoing feedback to help us improve our service to you.

Should you require further information on our rates for the service and maintenance of any gate systems, please do not hesitate to contact Lisa McCormack on 02 9316 4477 or via email lisa@aosgroup.com.au.

Ezi Products

This merger has also resulted in an improved manufacturing facility, which can now offer a **quicker** time to market as well **cost savings** that will be passed on in the price of our products. Our Product range will also be expanding over this year to incorporate Security Doors and Grilles and a greater range of Automated Gates and Pedestrian Control options.

We look forward to being tested on this by you in the near future and continuing to offer the best quality and safest "Perimeter Security Solutions" in the market. Troy Donnelly and Steve Ingram are more than happy to discuss any requirements you may have about the products in our range and can be contact either by phone on 02 9316 4477 or via email on troy@aosgroup.com.au or steve@aosgroup.com.au.
