

The Pedestrian Gate System

Ezi Security manufacture its products where we are able to guarantee optimum quality control
Ezi Security specialises in the manufacturing, sales, installations and servicing of physical barrier systems to our exacting standards

The Ezi Pedestrian Swing Gate System is designed to be utilised in a perimeter fence line situations to control access and egress.

These robust steel gates can also be used within a building and/or building complex and are usually used in conjunction with access control systems such as swipe cards, smart cards, keypads etc.

The Ezi Pedestrian Gate System is designed to compliment your existing industrial or decorative perimeter security fencing concepts. The painted finish is a high quality powder coat and the gate and frame can be manufactured from pre galvanised material. Powder coat paint finish is available in many popular colours.

For those extra high corrosive environments, Ezi Security can have your gate hot dip galvanised.

Gate frames can be either flange mounted and bolted or secured within concrete as per client preference. A robust mechanical gate stop and push/grab handles are standard features of the Ezi Pedestrian Swing Gate System.

All Ezi Pedestrian Swing Gate Systems come standard with an industrial quality, heavy duty pneumatic door closers. The gates may be secured via magnetic, electric strike or mortise locking units. Further, the whole gate may be fully or partially skinned on the secure side with Perspex, security mesh, or sheet metal according to site risk requirements.

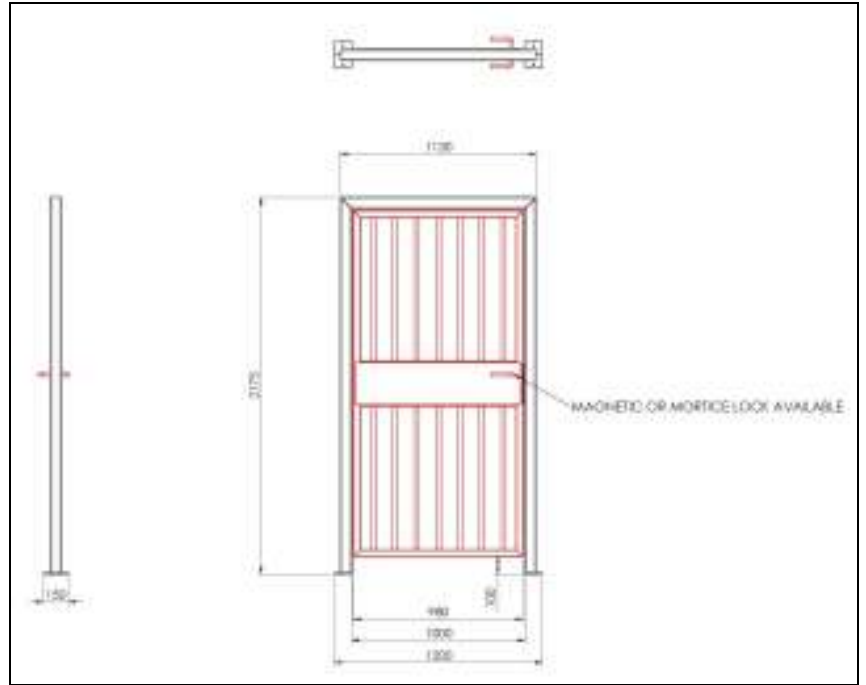

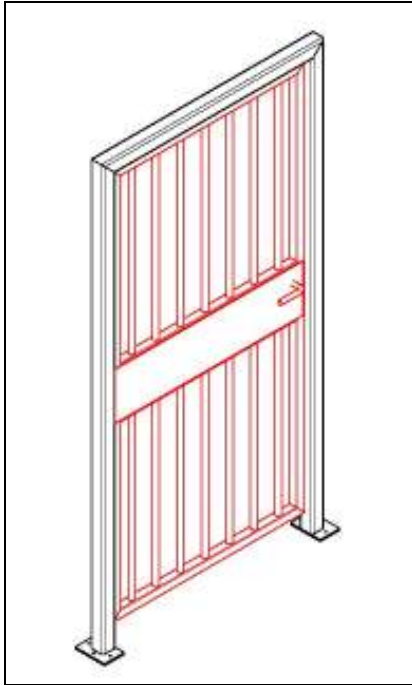

The Ezi Pedestrian Swing Gate System is also readily adaptable for electric fencing applications.

Ezi has an efficient and reliable automated (actuator arm driven) pedestrian swing gate designed with disabled access requirements in mind. These automated swing gates work well when paired with pedestrian turnstiles and allow access and egress for wheel chairs, parcels and those larger items through your secure perimeter.

As Ezi is an original equipment manufacturer, we can make a pedestrian gate to meet your individual requirements. Please contact our expert Sales Executives for further information

Technical Data for the Pedestrian Gate

Standard Pedestrian Gate Specifications

Gate width	1130mm
Gate height	2175mm standard
Gate Access width	1000mm
Gate frame	65mm x 65mm RHS (50sq RHS)
Gate leaf	40mm x 40mm RHS
Vertical bars	25mm x 25mm RHS
Gate clearance under	150mm nominal
Gate erected height	2350mm nominal
Gate finish	Powder coat painted
Gate hinge bearings	Ball bearing tuff style
