H Stop® 1200 V 2024

Technical details

Structure:

Frame made with steel tubes, 150 x 100 mm, anti-corrosion protection by hot dip galvanisation (according to standard EN ISO 1461).

For the safety of the public and those who put the equipment in place, all the parts of **H Stop® (anchors, etc.) are rounded or protected by moulded pieces.**

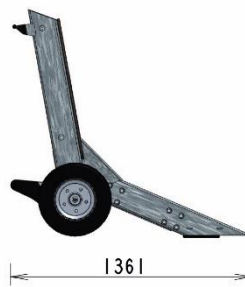

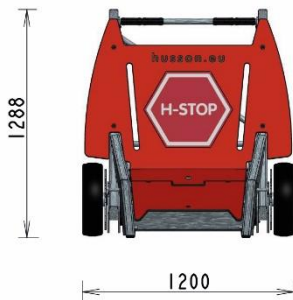

Ø 420 mm wheels, 115 mm wide, with profiled pneumatic tyres **for rolling on any type of surface**, including climbing kerbs, rolling on uneven ground, etc...

Wheel locking/unlocking system with key

Red panels thickness 14mm

Dimensions of 1 module:
width: 1200 mm; height 1288 mm
Weight: 179 kg

Possible customizations:
other colours of panels, lettering, logos, etc.

A very manoeuvrable device:

Quick to install; in a few minutes by one or two workers

Easy to move in a few seconds to let through emergency vehicles.

Once unlocked (using a special key), **H Stop® can be handled a bit like a cart.**

Requires no anchoring to the ground or assembly
